Article 4 of Regulation (EU) 2019/2088 on sustainability-related disclosures (SFDR) requires asset managers to disclose whether they consider adverse impacts of investment decisions on sustainability factors.

Oslo Asset Management AS does not consider adverse impacts of its investment decisions on sustainability factors. The main reason for this is, taking due account of the size, nature and scale of Oslo Asset Management's activities, that Oslo Asset Management does not currently have the capacity to prioritise the collection and validation of data required in order to report on principal adverse impacts indicators.

Oslo Asset Management will regularly review its position on this.
